 Hello World Institute

Address : 2nd Floor , Near KFC , Tower Square , Bhawarkua , Indore

Questions based on Conditional Statement (do - while loop statement)

1. Wap to print "hello world institute" message 7 times and "learn coding and make app" 12 tiems.
2. Write a program to display the first 100 natural numbers.
3. Write a program to display 100 to 1 numbers in reverse order.
4. Write a program to display table of given number.
5. Write a program to display even number series.
6. Write a program to display odd number series.
7. Write a program using a do...while loop that keeps displaying the message:
"papa please purchased bike "
Until the user presses 1 .
8. Write a program to create a simple calculator using a do...while loop.
The program should:
 1. Ask the user to enter two numbers.
 2. Ask the user to choose an operation:
 - + for addition
 - - for subtraction
 - * for multiplication
 - / for division
 3. Display the result.
 4. Ask the user if they want to perform another calculation (press 1 to continue, 0 to exit).
9. Write a program using a do...while loop that keeps taking numbers from the user and adds them to a running sum until the user presses 1. Finally, display the total sum.

10. Create a program that simulates a salary distribution system.

- 1. Take the total available salary amount at the start.**
- 2. Using a do...while loop, repeatedly take input for the amount to distribute to employees.**
- 3. Keep subtracting the distributed amounts from the total.**
- 4. Stop the process when the entire amount has been distributed or no more money is left.**
- 5. At the end, display:**
 - a. The total amount distributed.**
 - b. The remaining balance**

11. Write a for a Club Entry System with Menu and Billing.

The program should:

- 1. Ask the user for their age. If the age is less than 18, display a message "Entry not allowed" and exit. Otherwise, allow entry.**
- 2. Display a menu with at least 3 items and their prices.**
- 3. Allow the user to order items repeatedly until they press 1 to stop ordering.**
- 4. Keep a running total of the bill.**
- 5. At the end, display the total bill amount.**

12. Keep taking marks from the user until they enter a mark greater than 100 (invalid), then stop.

13. Keep asking for numbers until the user enters a multiple of 7, then stop.
